Dan Thomas

Designing with Empathy

FROM LIFE-CHANGING ORDEAL TO AWARD-SHORTLISTED DESIGNER

At 18, Dan Thomas survived a life-threatening illness that reshaped his outlook forever. That experience gave him a deep understanding of the challenges faced by those with reduced mobility – and the importance of safe, supportive, and inspiring spaces.

Now Chief Designer at Thomas Vaughan Ltd, Dan blends empathy with expertise, creating kitchens and bathrooms that balance independence, dignity, and style. Trained in Accessible design and a qualified clinical assessor, he works with clients and Occupational Therapists to deliver truly life-enhancing environments.

In 2025, Dan's dedication and innovation earned him national recognition as a finalist for KBSA Bathroom Designer of the Year.

DESIGN PRINCIPLES

BECAUSE PEACE OF MIND IS EVERYTHING

Safety

We reduce risks of falls and injuries by considering layout, correct worktop and oven heights, and features like waterfall-edge worktops, induction hobs, and heatproof sinks.

Style

Accessibility should never mean compromise. Our kitchens feature modern finishes, colour contrasts, lighting schemes, and statement pieces like adjustable-height worktops.

Smart Flexibility

Rise-and-fall electric worktops, pull-down wall units, extendable pull-out tables, and accessible storage support true independence.

Clever Storage

Easy-reach baskets, rotating larders, corner pull-outs, and wide pan drawers
